

SPEED THRILLS

Especially when it improves your throughput.

Fortrend's Plus 500™ SMIF Pod Load/Unload System delivers a blazing 35-second (or less) cycle time and disconnects/reconnects to virtually any process tool in 15-minutes. Time saved means higher wafer throughput.

With models for 150 mm and 200 mm pods, and a minimum footprint that conserves valuable floorspace, the Plus 500* is the best choice for automated fabs.

Since 1979, Fortrend has been the industry's most popular automation specialists. Call us today for a demonstration of our reliable wafer sorters, transfer systems and other innovative new intrabay automation products.
